

# Improve Patient Outcomes and Speed Time-to-Care

In an emergency, you don't have time to spare, and neither do your patients. Backline® EMS by DrFirst saves precious time and increases efficiency by giving you secure, real-time access to medication information and seamless communication with the hospital care team.

## Emergency Response

## Transport

## Community Health

### With Backline, you can:

- Scan a patient's driver's license for real-time medication history
- Send HIPAA-compliant text messages to different organizations
- Have telehealth video conferences with emergency physicians
- Share files securely, including images, video, forms, and more

### Which helps you:

- Improve patient assessments
- Connect with physicians for treatment consults
- Coordinate transport to alternate destinations
- Share information with emergency departments en route
- Reduce time on the scene, in transport, and at the hospital

**"For paramedics, every second is crucial.** With Backline®, our paramedics can safely and securely share data and medical information with our hospital healthcare team. **It helps them deliver faster, safer care** for our patients upon arrival."

*- Nick Smith, Nurse Manager,  
King's Daughter Medical Center Emergency Department*

Scan the driver's license barcode for six months of patient medication history.
